House Bill 1284

(Delegate Stein, *et al.*)

Environment and Transportation

Education, Health, and Environmental Affairs

---

Natural Resources - Aquaculture Leases - National Historic Landmarks

---

This bill prohibits the Department of Natural Resources (DNR) from authorizing an Aquaculture Enterprise Zone, a submerged land lease, a water column lease, or a demonstration lease within 300 feet of the mean high watermark of the shoreline of property designated by the U.S. Secretary of the Interior as a National Historic Landmark, unless the property owner has been notified of the proposed zone or lease and does not object to it.

---

Fiscal Summary

**State Effect:** The bill is not expected to materially affect State finances.

**Local Effect:** None.

**Small Business Effect:** Minimal.

---

Analysis

**Current Law:** Specified statutory restrictions are placed on the location of Aquaculture Enterprise Zones (defined in statute as an area of the Chesapeake Bay approved for the leasing of submerged land or the water column by DNR in consultation with the Maryland Department of the Environment and the wetlands administrator of the Board of Public Works), submerged land leases, water column leases, and demonstration leases (those leased exclusively for educational, conservation, or ecological purposes). The restrictions generally prohibit a zone or lease from being located:

- within a minimum of 50 feet of shoreline or any pier without the written permission of the riparian owner at the time of designation of the zone or initial application for the lease;
- within 150 feet of the public shellfish fishery or a registered pound net site;
- within 150 feet of an oyster reserve or any Yates Bar located in an oyster sanctuary;
- within 150 feet of a federal navigational channel;
- in any creek, cove, bay, or inlet less than 300 feet wide at its mouth at mean low tide;
- in a submerged aquatic vegetation protection zone; or
- in a setback or buffer from the Assateague Island National Seashore established by DNR.

### **Background:**

#### *Lease Applications and Siting*

DNR and the U.S. Army Corps of Engineers began jointly accepting applications for new commercial shellfish aquaculture projects in the Chesapeake Bay, its tributaries, and the coastal bays in 2010, and a person now applies for a lease using the *Joint Application for State Commercial Shellfish Aquaculture Lease and Corps of Engineers Federal Permit*.

DNR recommends that applicants take various steps relating to siting of the lease before submitting an application, including (1) utilizing the department's Aquaculture Siting Tool, an online interactive mapping utility that can assist in identifying potential lease locations by minimizing known resource and other types of conflicts; (2) investigating a site or sites by boat to, among other things, note other uses of the site, and adjacent uses; (3) if needed, contacting DNR's Aquaculture Division to help determine if the proposed site meets statutory requirements; and (4) discussing the project with adjacent landowners to, among other things, uncover additional issues to consider, such as licensed shoreline or offshore blinds used for waterfowl hunting not readily visible during the on-site investigation. DNR indicates that all adjacent landowners also receive direct notice of the project through State and federal notification processes.

DNR indicates, in its recent five-year oyster management review report (*Oyster Management Review: 2010-2015* (July 2016)), that Aquaculture Enterprise Zones, intended to eliminate regulatory hurdles and streamline the timeframe for lease approvals, are not being utilized, since changes to the law in 2011 provide the same benefits for leases in general.

*National Historic Landmarks*

The National Park Service indicates that National Historic Landmarks “are nationally significant historic places designated by the Secretary of the Interior because they possess exceptional value or quality in illustrating or interpreting the heritage of the United States.” There are more than 2,500 National Historic Landmarks, including approximately 75 in Maryland.
