2019 Session

FISCAL AND POLICY NOTE
First Reader

Senate Bill 836

(Senator Carter)

Judicial Proceedings

Criminal Law - Drug Paraphernalia - Prevention of HIV and Viral Hepatitis

This bill specifies that the criminal prohibition on drug paraphernalia does not apply to (1) the use or possession of drug paraphernalia that has been provided or obtained as a means of preventing the spread of human immunodeficiency virus (HIV) or viral hepatitis and (2) the delivery or sale, or manufacture or possession with intent to deliver or sell, drug paraphernalia intended to serve as a means of preventing the spread of HIV or viral hepatitis.

Fiscal Summary

State Effect: Potential minimal decrease in general fund revenues due to the limits on applicability specified by the bill for those cases that might otherwise be heard in the District Court. No effect on expenditures.

Local Effect: Potential minimal decrease in revenues due to the limits on applicability specified by the bill for those cases that otherwise might be heard in the circuit courts. No effect on expenditures.

Small Business Effect: None.

Analysis

Current Law/Background:

Use or Possession of Paraphernalia

Unless authorized under law, a person may not use or possess with intent to use drug paraphernalia to:

- plant, propagate, cultivate, grow, harvest, manufacture, compound, convert, produce, process, prepare, test, analyze, pack, repack, store, contain, or conceal a controlled dangerous substance (CDS); or
- inject, ingest, inhale, or otherwise introduce a CDS into the human body.

Chapter 4 of 2017 repealed the criminal prohibition on use or possession of marijuana-related drug paraphernalia.

Delivery or Sale of Paraphernalia

Unless authorized under law, a person may not deliver or sell, or manufacture or possess with the intent to deliver or sell, drug paraphernalia, knowing or under circumstances where a person reasonably should know that the drug paraphernalia will be used to:

- plant, propagate, cultivate, grow, harvest, manufacture, compound, convert, produce, process, prepare, test, analyze, pack, repack, store, contain, or conceal a CDS; or
- inject, ingest, inhale, or otherwise introduce a CDS into the human body.

Exhibit 1 contains information on penalties for offenses involving both the use or possession and the delivery or sale of drug paraphernalia.

Exchange of Sterile Syringes

In February 2015, Governor Hogan established, by executive order, the Heroin and Opioid Emergency Task Force. The task force issued its final report in December 2015, which included a recommendation for legislation authorizing any county in Maryland to establish an opioid-associated disease prevention and outreach program to provide outreach, education, and linkage to treatment services, including the exchange of sterile syringes to people who inject drugs.

Chapter 348 of 2016 authorized a local health department or a community-based organization, with the approval of the Maryland Department of Health (MDH) and the appropriate local health officer, to establish an opioid-associated disease prevention and outreach program. A program must:

- provide security of program locations and equipment;
- allow participants to obtain and return hypodermic needles and syringes at any program location, if more than one location is available;
- have appropriate staff expertise in working with individuals who inject drugs;
- include adequate staff training;

- disseminate other means for curtailing the spread of HIV and viral hepatitis;
- link individuals to additional services, including substance-related disorder counseling, treatment, and recovery services; testing for specified diseases; reproductive health education and services; wound care; and overdose response program services;
- educate participants on the dangers of contracting HIV and viral hepatitis;
- provide overdose prevention education and access to naloxone or a referral to obtain naloxone;
- establish procedures for identifying program participants in accordance with specified confidentiality provisions;
- establish methods for identifying and authorizing staff members and volunteers who have access to hypodermic needles, syringes, and program records;
- develop a plan for data collection and program evaluation; and
- collect and report specified information to MDH at least annually.

Exhibit 1

Penalties for Use or Possession and Delivery or Sale of Drug Paraphernalia

<u>Violation</u>	<u>Penalty</u>
First-time violation (use, possession, delivery, or sale)	Misdemeanor \$500 maximum fine
Subsequent violation (use, possession, delivery, or sale)	Misdemeanor Up to two years imprisonment and/or a maximum fine of \$2,000
First-time violation (use, possession, delivery, or sale) – violator has a prior conviction for delivery of drug paraphernalia by an adult to a minor who is at least three years younger	Misdemeanor Up to two years imprisonment and/or a maximum fine of \$2,000
Delivery of drug paraphernalia by an adult to a minor who is at least three years younger	Misdemeanor Up to eight years imprisonment and/or a maximum fine of \$15,000

Appendix – Opioid Crisis

Opioid Overdose Deaths

While heroin and prescription opioid deaths have begun to taper off, fentanyl deaths have continued to rise at a high rate. As seen in **Exhibit 1**, between 2016 and 2017, prescription opioid-related deaths in Maryland decreased negligibly by 1% (from 418 to 413) while heroin-related deaths decreased by 11% (from 1,212 to 1,078). However, fentanyl-related deaths increased by 42% (from 1,119 to 1,594). Between January and June 2018, there were 1,038 deaths related to fentanyl, a 30% increase over the same time period for 2017.

Federal Actions to Address the Opioid Crisis

In 2016, the Comprehensive Addiction and Recovery Act authorized over \$181 million annually, and the 21st Century Cures Act (CURES Act) authorized up to \$970 million to be distributed through the State Targeted Response to the Opioid Crisis Grants. The grants are to be used by states to increase access to treatment and reduce unmet treatment needs and opioid-related overdose deaths. In 2017, Maryland received a two-year, \$20 million grant for the prevention and treatment of opioid abuse. In March 2017, President Donald J. Trump signed an executive order establishing the President's Commission on Combating Drug Addiction and the Opioid Crisis. The commission issued

a final report in November 2017, with 56 recommendations, including a recommendation for federal block grant funding for state activities relating to opioids and substance use disorders.

In 2018, the Substance Use-Disorder Prevention that Promotes Opioid Recovery and Treatment (SUPPORT) for Patients and Communities Act was passed. The legislation expands existing programs and creates new programs to prevent substance use disorders and overdoses, including reauthorization of the Office of National Drug Control Policy, new Centers for Disease Control and Prevention grants for states and localities to improve prescription drug monitoring programs, and funding to encourage research into nonaddictive painkillers. Additionally, the legislation partially lifts the restriction that blocks states from spending federal Medicaid dollars on residential addiction treatment centers by allowing payments for residential services for up to 30 days while also allowing Medicare to cover medication-assisted treatment (MAT) in certain settings for the treatment of substance use disorder.

Maryland Actions to Address the Opioid Crisis

The General Assembly passed several comprehensive acts during the 2017 session to address the State's opioid crisis, which addressed prevention, treatment, overdose response, and prescribing guidelines.

Chapters 571 and 572 of 2017, the Heroin and Opioid Prevention Effort and Treatment Act, among other things, require (1) the Behavioral Health Administration to establish crisis treatment centers that provide individuals in a substance use disorder crisis with access to clinical staff; (2) the Maryland Department of Health (MDH) to establish and operate a toll-free health crisis hotline; (3) certain health care facilities and systems to make available to patients the services of health care providers who are trained and authorized under federal law to prescribe opioid addiction treatment medications, including buprenorphine; (4) each hospital to have a protocol for discharging a patient who was treated for an overdose or identified as having a substance use disorder; (5) the Governor's proposed budget for fiscal 2019 through 2021 to include specified rate adjustments for community behavioral health providers; (6) the Department of Public Safety and Correctional Services and MDH to develop a plan to increase the provision of substance use disorder treatment, including MAT, in prisons and jails; (7) authorization of the provision of naloxone through a standing order and guidelines to co-prescribe naloxone to high-risk individuals; and (8) the expansion of private insurance coverage for opioid use disorders by prohibiting certain carriers from requiring preauthorization for a prescription drug used for treatment of an opioid use disorder that contains methadone, buprenorphine, or naltrexone.

Chapters 573 and 574 of 2017, the Heroin and Opioid Education and Community Action Act (Start Talking Maryland Act), require (1) the State Board of Education to expand an existing program in public schools to encompass drug addiction and prevention education that includes instruction related to heroin and opioid addiction and prevention and information relating to the lethal effect of fentanyl; (2) each local board of education to establish a policy requiring each public school to obtain and store naloxone and other overdose-reversing medication to be used in an emergency situation; (3) each local board of education or local health department to hire a sufficient number of community action officials or develop and implement a program that provides community relations and education functions that coordinate forums and conduct public relations efforts; and (4) specified institutions of higher education in Maryland to establish a policy that addresses heroin and opioid addiction and prevention, including awareness training for incoming students, obtaining and storing naloxone, and campus police training.

Chapter 570 of 2017 requires a health care provider, on treatment for pain and based on the provider's clinical judgment, to prescribe the lowest effective dose of an opioid and a quantity that is no greater than that needed for the expected duration of pain severe enough to require an opioid that is a controlled dangerous substance (CDS). The quantity limitations do not apply to opioids prescribed to treat a substance-related disorder; pain associated with a cancer diagnosis; pain experienced while the patient is receiving end-of-life, hospice, or palliative care services; or chronic pain.

In January 2017, Governor Lawrence J. Hogan issued an executive order establishing an Opioid Operational Command Center (OOCC) to facilitate collaboration between State and local public health, human services, education, and public safety entities to combat the heroin and opioid crisis. OOCC will (1) develop operational strategies to continue implementing the recommendations of the Governor's Heroin and Opioid Emergency Task Force; (2) collect, analyze, and facilitate data sharing relevant to the heroin and opioid epidemic; (3) develop a memorandum of understanding among State and local agencies regarding sharing and collection of health and public safety information and data relating to the epidemic; (4) assist and support local agencies in the creation of opioid intervention teams; and (5) coordinate the training of and provide resources for State and local agencies addressing the threat to the public health, security, and economic well-being of the State.

In March 2017, Maryland became the first state to declare a state of emergency for the opioid crisis, activating the Governor's emergency management authority and enabling increased and more rapid coordination between the State and local jurisdictions. In conjunction with the declaration, Governor Hogan included a supplemental budget appropriation of \$10 million, part of a \$50 million, five-year commitment.

In July 2017, \$22 million was appropriated for fiscal 2018, including \$10 million in CURES Act funding, to be used for prevention, treatment, and enforcement activities. Prevention efforts include distribution of opioid intervention teams for each jurisdiction, a

public awareness campaign, funding to train community teams on overdose response and linking to treatment, a pilot program to create school-based teams for early identification of the problems related to substance use disorders, and distribution of opioid information to health care facilities and providers that offer treatment. Enforcement initiatives include funding to disrupt drug trafficking organizations for the heroin coordinator program and to increase MDH's regulatory oversight of CDS. Treatment funding will be used to expand treatment beds and implement a tracking system to identify available beds; improve access to naloxone; establish a 24-hour crisis center in Baltimore City; expand use of peer recovery support specialists; expand Screening, Brief Intervention, and Referral to Treatment to hospitals and parole, probation, and correctional facilities; increase access to MAT; expand law enforcement diversion programs; and improve the State's crisis hotline.

In 2018, the General Assembly expanded upon the comprehensive legislation of the prior year. Chapter 149 of 2018 authorizes an emergency medical services provider or law enforcement officer to report an actual or suspected overdose to an appropriate information technology platform. Chapter 211 of 2018 requires MDH to identify a method for establishing a tip line for a person to report a licensed prescriber who the person suspects is overprescribing certain medications. Chapters 215 and 216 of 2018 require a health care provider to advise a patient of the benefits and risks associated with a prescribed opioid or co-prescribed benzodiazepine. Chapters 439 and 440 of 2018 require a general hospice care program to establish a written policy for the collection and disposal of unused prescription medication and require a program employee to collect and dispose of a patient's unused medication on the death of the patient or the termination of a prescription.
