7 **PART I. STATEWIDE INVENTORY AND EMISSIONS REDUCTION PLAN.**

8 2–1201.

9 (a) In this subtitle the following words have the meanings indicated.

10 (b) “Alternative compliance mechanism” means an action authorized by  
11 regulations adopted by the Department that achieves the equivalent reduction of  
12 greenhouse gas emissions over the same period as a direct emissions reduction.

13 (c) “Carbon dioxide equivalent” means the measurement of a given weight of a  
14 greenhouse gas that has the same global warming potential, measured over a specified  
15 period of time, as one metric ton of carbon dioxide.

16 (d) “Direct emissions reduction” means a reduction of greenhouse gas emissions  
17 from a greenhouse gas emissions source.

18 (e) “Greenhouse gas” includes carbon dioxide, methane, nitrous oxide,  
19 hydrofluorocarbons, perfluorocarbons, and sulfur hexafluoride.

20 (f) “Greenhouse gas emissions source” means a source or category of sources of  
21 greenhouse gas emissions that have emissions of greenhouse gases that are subject to  
22 reporting requirements or other provisions of this subtitle, as determined by the  
23 Department.

24 (g) “Leakage” means a reduction in greenhouse gas emissions within the State  
25 that is offset by a corresponding increase in greenhouse gas emissions from a greenhouse  
26 gas emissions source located outside the State that is not subject to a similar state,  
27 interstate, or regional greenhouse gas emissions cap or limitation.

28 (h) (1) “Manufacturing” means the process of substantially transforming, or a  
29 substantial step in the process of substantially transforming, tangible personal property  
30 into a new and different article of tangible personal property by the use of labor or  
31 machinery.

32 (2) “Manufacturing”, when performed by companies primarily engaged in  
33 the activities described in paragraph (1) of this subsection, includes:

- 1 (i) The operation of saw mills, grain mills, or feed mills;
- 2 (ii) The operation of machinery and equipment used to extract and  
3 process minerals, metals, or earthen materials or by-products that result from the  
4 extracting or processing; and
- 5 (iii) Research and development activities.
- 6 (3) “Manufacturing” does not include:
- 7 (i) Activities that are primarily a service;
- 8 (ii) Activities that are intellectual, artistic, or clerical in nature;
- 9 (iii) Public utility services, including gas, electric, water, and steam  
10 production services; or
- 11 (iv) Any other activity that would not commonly be considered as  
12 manufacturing.

13 (i) “Statewide greenhouse gas emissions” means the total annual emissions of  
14 greenhouse gases in the State, measured in metric tons of carbon dioxide equivalents,  
15 including all emissions of greenhouse gases from the generation of electricity delivered to  
16 and consumed in the State, and line losses from the transmission and distribution of  
17 electricity, whether the electricity is generated in-State or imported.

18 2-1202.

19 The General Assembly finds that:

- 20 (1) Greenhouse gases are air pollutants that threaten to endanger the  
21 public health and welfare of the people of Maryland;
- 22 (2) Global warming poses a serious threat to the State’s future health,  
23 well-being, and prosperity;
- 24 (3) With 3,100 miles of tidally influenced shoreline, Maryland is vulnerable  
25 to the threat posed by global warming and susceptible to rising sea levels and flooding,  
26 which would have detrimental and costly effects;
- 27 (4) The State has the ingenuity to reduce the threat of global warming and  
28 make greenhouse gas reductions a part of the State’s future by achieving a 25% reduction  
29 in greenhouse gas emissions from 2006 levels by 2020 and by preparing a plan to meet a  
30 longer-term goal of reducing greenhouse gas emissions by up to 90% from 2006 levels by  
31 2050 in a manner that promotes new “green” jobs, and protects existing jobs and the State’s  
32 economic well-being;

1 (5) Studies have shown that energy efficiency programs and technological  
2 initiatives consistent with the goal of reducing greenhouse gas emissions can result in a net  
3 economic benefit to the State;

4 (8) It is necessary to protect the public health, economic well-being, and  
5 natural treasures of the State by reducing harmful air pollutants such as greenhouse gas  
6 emissions by using practical solutions that are already at the State's disposal;

7 2-1204.1.

8 (A) The State shall reduce statewide greenhouse gas emissions by [40%]:

9 (1) 60% from 2006 levels by 2030; AND

10 (2) 100% FROM 2006 LEVELS BY 2040.

11 (B) AFTER 2040, STATEWIDE GREENHOUSE GAS EMISSIONS SHALL BE NET  
12 NEGATIVE.

13 2-1205.

14 (a) The State shall develop plans, adopt regulations, and implement programs  
15 that reduce statewide greenhouse gas emissions in accordance with this subtitle.

16 (b) On or before December 31, 2018, the Department shall:

17 (1) Submit a proposed plan that reduces statewide greenhouse gas  
18 emissions by 40% from 2006 levels by 2030 to the Governor and General Assembly;

19 (2) Make the proposed plan available to the public; and

20 (3) Convene a series of public workshops to provide interested parties with  
21 an opportunity to comment on the proposed plan.

22 (c) (1) The Department shall, on or before December 31, 2012, adopt a final  
23 plan that reduces statewide greenhouse gas emissions by 25% from 2006 levels by 2020.

24 (2) The Department shall, on or before [December 31, 2019] **DECEMBER**  
25 **31, 2022**, adopt a final plan that reduces statewide greenhouse gas emissions by [40%]  
26 **60%** from 2006 levels by 2030.

27 (3) The plans shall be developed in recognition of the finding by the  
28 Intergovernmental Panel on Climate Change that developed countries will need to reduce  
29 greenhouse gas emissions by between 80% and 95% from 1990 levels by 2050.

1 (d) The final plans required under subsection (c) of this section shall include:

2 (1) Adopted regulations that implement all plan measures for which State  
3 agencies have existing statutory authority; and

4 (2) A summary of any new legislative authority needed to fully implement  
5 the plans and a timeline for seeking legislative authority.

6 (e) In developing and adopting a final plan to reduce statewide greenhouse gas  
7 emissions, the Department shall consult with State and local agencies as appropriate.

8 (f) (1) Unless required by federal law or regulations or existing State law,  
9 regulations adopted by State agencies to implement a final plan may not:

10 (i) Require greenhouse gas emissions reductions from the State's  
11 manufacturing sector; or

12 (ii) Cause a significant increase in costs to the State's manufacturing  
13 sector.

14 (2) Paragraph (1) of this subsection may not be construed to exempt  
15 greenhouse gas emissions sources in the State's manufacturing sector from the obligation  
16 to comply with:

17 (i) Greenhouse gas emissions monitoring, recordkeeping, and  
18 reporting requirements for which the Department had existing authority under § 2-301(a)  
19 of this title on or before October 1, 2009; or

20 (ii) Greenhouse gas emissions reductions required of the  
21 manufacturing sector as a result of the State's implementation of the Regional Greenhouse  
22 Gas Initiative.

23 (g) A regulation adopted by a State agency for the purpose of reducing greenhouse  
24 gas emissions in accordance with this section may not be construed to result in a significant  
25 increase in costs to the State's manufacturing sector unless the source would not incur the  
26 cost increase but for the new regulation.

27 2-1211.

28 The Department shall monitor implementation of the plans required under § 2-1205  
29 of this subtitle and shall submit a report, on or before [October 1, 2022] **DECEMBER 31,**  
30 **2022**, and every [5] **3** years thereafter, to the Governor and, in accordance with § 2-1257  
31 of the State Government Article, the General Assembly that describes the State's progress  
32 toward achieving:

33 (1) The reductions in greenhouse gas emissions required under this  
34 subtitle, or any revisions conducted in accordance with § 2-1210 of this subtitle; and

1           (2) The greenhouse gas emissions reductions needed by 2050 in order to  
2 avoid dangerous anthropogenic changes to the Earth’s climate system, based on the  
3 predominant view of the scientific community at the time of the latest report.
