10. Description and Purpose of Organization (Limit length to visible area)		
<p>The Montgomery County Department of Parks is a key agency of The Maryland-National Capital Park and Planning Commission (M-NCPPC), the proud steward of over 37,000 acres of parkland. Our mission is to protect and interpret the county's valuable natural and cultural resources; balance the demand for recreation with the need for conservation; offer a variety of enjoyable recreational activities that encourage healthy lifestyles; and provide clean, safe, and accessible places for leisure-time activities.</p>		

11. Description and Purpose of Project (Limit length to visible area)

The purpose of the project is to renovate the existing Little Falls paved trail from its connection at Hillandale Road near the Bethesda Pool to the intersection of Dorset Avenue. The existing trail is in poor condition with significant drainage issues. This project will renovate the existing trail, improve community connections, ensure ADA compliance, retrofit stormwater management, and enhance adjacent riparian conditions.

Round all amounts to the nearest \$1,000. The totals in Items 12 (Estimated Capital Costs) and 13 (Proposed Funding Sources) must match. The proposed funding sources must not include the value of real property unless an equivalent value is shown under Estimated Capital Costs.

28. Comments	
<p>Located in Bethesda, Maryland, Little Falls Stream Valley Park offers both recreational and conservation-based resources. Associated with the Capital Crescent Trail, it is one of the most popular parks in Montgomery County, providing an important outdoor amenity to the densely populated and diverse community residing in District 19.</p> <p>Little Falls Trail has been an important asset to the adjacent neighborhood and larger community to provide outdoor recreation and access to the Stream Valley Park. It also serves as a connection to the Bethesda Pool and Little Falls Parkway. In recent years the trail has complemented Montgomery Parks Open Parkway Program and provided safety outdoors activities. Trail usage has increased throughout Montgomery Parks as a result of the pandemic, which has highlighted the need to renovate older amenities like the Little Falls Trail. Also, this area was developed prior to the advent of stormwater management practices and unfortunately contributes to the poor ecological condition of the Willett Branch. Funding for this project will allow Parks to retrofit stormwater management techniques and environmental enhancements into the stream valley buffer. The asphalt which constitutes the hard surface trails must be replaced once it begins to deteriorate to maintain a safe and pleasant experience for Park users. Little Falls Stream Valley Park features miles of hard surface trail which are maintained by Montgomery Parks, however, there is not enough funding in the budget to allow us to make comprehensive renovations to all trail systems as quickly as they are needed.</p> <p>With the funding from the State, Montgomery Parks will be able to move the timing of the trail renovation up considerably, delivering a renovated trail to the community more quickly than the normal asset replacement schedule allows. The existing asphalt on this trail, which is in poor condition, will be replaced and upgraded to meet the current ADA accessibility requirements for outdoor trails. This upgrade will allow broader access on the trail to amenities throughout the park for users with varying physical abilities. While work crews are making these vital upgrades, associated drainage improvements and shoulder stabilization will also improve the overall quality of the trail.</p> <p>Thank you for considering this important project for a Capital Grant in the 2022 General Session.</p>
