11. Description and Purpose of Project (Limit length to visible area)

As a result of the ongoing financial recovery from COVID impacts to our non-profit fraternal organization, we are in need of funds assistance to offset costs associated with failing infrastructure systems. Specifically, our building HVAC is currently 22 years old and has outlived its expectations. The system is now in a failing status, making it difficult to support our local community programs and provide meeting space for our scouts and other youth activities that the lodge is utilized to support. The effort to replace the current HVAC system is proposed to move away from fossil fuels and towards electrically efficient systems, aligning with state goals. With the updated system, we anticipate having the ability to increase our community involvement by hosting veteran's based programs and to facilitate expanding our youth activities.
