House Bill 1018 (Delegate Qi)
Ways and Means

Manufacturing Business Personal Property Tax - Exemption

This bill exempts the personal property in the possession of a person engaged in a manufacturing business that is a small or medium-sized enterprise from county and municipal property tax, including any special taxing district property tax. **The bill takes effect June 1, 2024, and applies to taxable years beginning after June 30, 2024.**

Fiscal Summary

State Effect: None.

Local Effect: County and municipal property tax revenues decrease beginning in FY 2025. Based on current available data, Worcester County property tax revenues decrease by approximately \$470,200 and municipal property tax revenues decrease by approximately \$4.8 million annually. **This bill imposes a mandate on a unit of local government.**

Small Business Effect: Potential meaningful. Small manufacturing businesses will pay less in personal property taxes.

Analysis

Current Law:

Personal Property Taxation

In Maryland, there is a tax on business-owned personal property that is imposed and collected by local governments. Personal property generally includes business property

including furniture, fixtures, office and industrial equipment, machinery, tools, supplies, inventory, and any other property not classified as real property. To provide for uniform assessments, the State Department of Assessments and Taxation (SDAT) is responsible for assessing all personal property. Each county or municipal government is responsible for issuing the tax bills and collecting the tax. The tax year begins on July 1 and ends on June 30. The personal property tax has been a local tax exclusively since 1984 when the State tax rate on personal property was set at zero.

Personal Property Assessment Process

At the beginning of each calendar year, SDAT notifies business entities on record that a personal property tax return must be filed by April 15. This tax return must include personal property located in Maryland as of January 1, the date of finality. The date of finality is the date used to determine ownership, location, value, and liability for tax purposes. The assessment is calculated using the cost less depreciation method. Once the assessment is completed, it is certified to the county or municipality in Maryland. SDAT shares the certifications for the current assessment year by July 1 when the jurisdictions can start billing. If a business entity wants to appeal the assessment, they have 45 days from the date of notice to appeal. All tax returns are currently filed electronically. An annual report fee is required to be paid to SDAT with the personal property tax return. The annual report fee is for the privilege of maintaining the legal entity's existence in the State.

The operating property of a utility or railroad is assessed by SDAT's Utility Valuation Department using the unit valuation method. The operating property of a utility includes all real property and personal property used to operate the utility. SDAT calculates the value (operating unit) of the public utility using the required annual return filings, regulatory filings (federal and State), and other publicly available information. A portion of the company's operating unit is allocated to Maryland based on the amount of the utility's property located in the State. The allocation to Maryland is then further divided into real and personal property values and apportioned to the counties and municipalities where the property is located. The Utility Valuation Department also completes the personal property assessments of non-utility electric generators and cable companies following the procedures set by the business personal property unit and the Code of Maryland Regulations.

The assessment process for personal property does not differ for counties and municipalities. However, there may be differences in exemptions and/or the taxable nature of certain property between jurisdictions that may affect an assessment because counties and municipalities may exempt different types of personal property from personal property taxes. The certification of assessments and notification to the jurisdictions is the same for all counties and municipalities as well as the appeal period.

Local Property Tax Rate Setting Authority

Title 8 of the Tax Property Article establishes the methods of property valuation and assessments and lists those classifications of property created by the General Assembly. For assessment purposes, property is divided into two classes – real property and personal property. Real property is divided into 11 subclasses and personal property is divided into 7 subclasses. The State only imposes a property tax on real property, whereas county governments impose separate tax rates for real and personal property. State and county governments are not authorized to set separate property tax rates among different subclasses of property.

Establishing Personal Property Tax Rates

Prior to July 1, 2013, State law required the county personal property tax rate to be set at 2.5 times the county real property tax rate. Beginning July 1, 2013, the county personal property tax rate was decoupled from the county real property tax rate by authorizing county governments to set a personal property tax rate at no more than 2.5 times the county real property tax rate.

Under Tax-Property Article Section 6-303, municipal governments are granted authority to set municipal tax rates. Chapter 80 of 2000 could have been interpreted to require that counties and municipalities set personal property tax rates at 2.5 times their rates of real property tax, in order to ensure revenue neutrality when the valuation of real property went from 40% to 100%. However, unlike counties, municipalities have historically had broader authority to set different tax rates on classes of property. When Section 6-303 was amended by Chapter 80, it failed to recognize the ability of municipal governments to set different tax rates for different classes of property. Chapter 37 of 2001 clarified that municipal governments may set differing tax rates among classes of property that are not tied to the real property tax rate.

Local Fiscal Effect: County and municipal personal property tax revenues decrease by a significant amount beginning in fiscal 2025. As shown in **Exhibit 1**, Worcester County could realize a \$470,200 annual revenue loss, while municipalities could realize a \$4.8 million annual revenue loss.

Worcester County Fiscal Impact

Based on data provided by SDAT, Worcester County is the only county that taxes manufacturing personal property. For fiscal 2023, the county had a manufacturing personal property base of approximately \$22.3 million and a personal property tax rate of \$2.1125 per \$100 of assessment. As a result, Worcester County personal property tax revenues could decrease by approximately \$470,200 beginning in fiscal 2025.

Municipal Fiscal Impact

SDAT reports that for fiscal 2023, 57 municipalities reported business personal property for manufacturing equipment with the corresponding personal property base totaling approximately \$358.6 million. Based on the current municipal personal property tax rates, municipal personal property tax revenues could decrease by approximately \$4.8 million beginning in fiscal 2025. The most significant impact on municipal revenues occurs in the Eastern Shore counties of Caroline, Dorchester, and Wicomico, where municipalities in those counties could lose over \$1.0 million in property tax revenue. To the extent there are other municipalities that tax manufacturing personal property, the total municipal revenue loss could be greater. The bill does not define a small or medium-sized enterprise so the estimate reflects all manufacturing personal property as reported by SDAT.
