

# The Steps of Rapid HIA

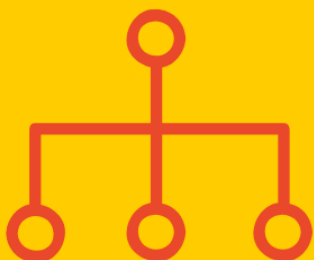

A Rapid HIA is a simple and quick health impact assessment that assesses the health impacts of a proposed project or policy. While no two are exactly alike, all Rapid HIA's generally follow this structure.

## Screening

Determine if an HIA is needed and if it will be useful.

STEP  
01

STEP  
02

## Scoping

Identify potential health benefits and risks.

## Assessment

Assess the potential health impacts of the decision.

STEP  
03

STEP  
04

## Recommendations

Develop practical solutions.

## Reporting

Disseminate the findings to decision makers.

STEP  
05

## Monitoring and Evaluation

Monitor the changes in health risk factors.
