

Good Evening,

I am writing to you today in an effort to have my voice heard. I understand that this bill is being discussed on 3/5/20 and I am urging you to support it out of the best interest of our children.

- This bill upholds the fundamental rights of parents to direct the upbringing, education, care, and welfare of their children, which has been under attack this session in certain proposed legislation.
- Parents demonstrably have the highest vested interest in their children's welfare and are best equipped to make important decisions for their children regarding their care.
- The state provides remedies for rare cases in which children are living in circumstances of abuse and neglect. There is no context in which it's necessary or appropriate for the state legislature to pass laws which undermine or usurp the authority of all parents, the vast majority of whom provide much better care and decision-making for their children than the state is capable of providing.
- The Supreme Court ruled in 1979: "Most children, even in adolescence, simply are not able to make sound judgements concerning many decisions, including their need for medical care or treatment. Parents can and must make those judgements."

Please know that this is something very near and dear to me. Please choose to represent those of us that feel like our children's well-being is worth fighting for.

Very Respectfully,

**Megan Copeland, MS, CNS, LDN**
