To Whom it May Concern,

I am writing to inform you that I fully support the bill HB1171. If this law does not pass, then there is a chance my husband could lose his job. Right now, he is the only one bringing in an income to provide for our family. This loss would be detrimental and would impact the well-being of our family. Currently, there is not enough evidence to prove that these vaccines are safe and effective. I believe that people should be able to make an informed choice with their doctor and not be forced by their employer to make medical decisions in order to keep their jobs. Also, I am a black woman and mother and historically there have been several medical atrocities committed by the government against black and brown people all in the name of science. Please stand with us and help protect us from being guinea pigs for these experimental vaccines that have only been given EMERGENCY use authorization. Thank you for your time and consideration.

Best regards,

Sabreen Williams Gunsby
