

PROTECT WORKERS

SUPPORT HB1171

HISTORIC RACISM

COMMUNITIES OF COLOR

There is a well known history of experimentation on black and brown bodies by Governments and the Pharmaceutical industry. They MUST have a right to say NO!

SUPPORT RESEARCH

Research Studies/ Clinical Trials are not set to finish until 2023. Mandating any vaccination before the studies have completed is anti-science and anti-human rights.

PRO-SCIENCE

MEDICAL DECISIONS

Patients should be making medical decisions with their doctors, not with their employers! No intervention is right for every person. We are not one-size-fits-all

MADE WITH DOCTORS

Currently, in Black and Brown communities there are major hesitations about taking the COVID-19 vaccination. Allowing employer's to fire employees who refuse the vaccine will disproportionately impact communities of color!

DISPARATE IMPACTS HURTS MINORITY WORKERS

WORKERS HAVE RIGHTS!

Help Protect Maryland Worker's Rights!
