

I am very concerned over the hysteria to get a fast tracked 'vaccine' that has not been officially approved by the FDA. No one knows the long term affects and we need to fight against any future (potential) mandates to get this shot in order to live our lives and be able to travel and attend events. Also, it is very disturbing that it has been placed in the minds of many that although they are fully vaccinated that they still must wear a mask and follow all protocol to still be 'safe'. This tells me that there is an agenda and it has nothing to do with Covid-19 at this point. If people still are forced to live this way, then we need to be asking why regarding a fast- tracked vaccine under an Emergency Use Authorization.
