

# MARYLAND RETAILERS ASSOCIATION

*The Voice of Retailing in Maryland*

**SB771, SB790, SB811, SB814, SB816, SB817, SB818**

**Finance Committee**

**March 2, 2021**

**Position:** Favorable (SB816)

**Background:** A variety of bills have been filed to address the structure and solvency of the state's Unemployment Insurance Trust Fund (UITF). The Maryland Retailers Association (MRA) serves on the State's Joint Committee on Unemployment Insurance that meets to review and discuss bills to try to find consensus on changes to the law. Unfortunately, the Committee has not been able to meet yet this year due to the unusual nature of the 2021 Session. Stakeholder involvement is critical to be sensitive to many concerns.

**Comments:** Due to the business closures and economic burdens caused by the COVID-19 pandemic, the UTIF balance is currently shrinking at the fastest rate that we have experienced in the last century. According to the Issue Papers developed by the Department of Legislative Services, claimants received \$1.4 billion in benefits from the UTIF between March and September 2020.

Employers in Maryland are responsible for paying into the State UTIF, and their unemployment insurance tax rates are based in part on the solvency of the UTIF. As this Committee is considering a variety of bills that have been proposed regarding this issue, MRA has concerns that some proposals, including those to increase the income disregard amount for weekly benefits, could have an adverse effect on small businesses by drastically increasing the unemployment insurance tax rates for businesses. We urge the committee to be sensitive to the financial challenges that are not resolved for many businesses who could be crushed by such a massive, immediate increase.

MRA would respectfully recommend that this body move measures such as those proposed in SB811, which was modeled after legislation passed in New Jersey. This proposal would create a phase-in system for employers so they do not go from table F to table A overnight. Mitigating these increases would more appropriately balance providing for the solvency of UTIF with protecting small businesses from high tax rates.

MRA also supports proposals like those included in SB814 and SB816, which would help to ease the burdens on small businesses that are still recovering from the shut-downs imposed due to the pandemic. Additionally, MRA supports efforts to study the current UTIF system, like those proposed in SB817. MRA would be happy to review and work with proponents on SB771, SB790, and SB818.

Thank you for your consideration. We look forward to working with the Committee on this important issue.
