

Dear Maryland Delegates,

HB 1150 must be approved to protect the Citizens of Maryland from the medical tyranny that is being deluged upon us.

Why are non-government bodies being given authority to infringe upon our rights? This is entirely unconstitutional. Governments were created to protect the people and to give power to the people, not to give that protection and power away to other entities.

These entities receive licenses to operate and perform commerce in the public domain and they should not be allowed to take away our rights just like the Government cannot take away our rights.

Passing this bill enforces our Constitution and helps to solidify our rights under that Constitution!

Please give this bill favorable support and APPROVE it to move forward.

Thank you,

Linda Diefenbach
