

My name is Bethany Hung, a resident of district 46 and current medical student at the Johns Hopkins University School of Medicine. I am testifying in support of HB0336 to repeal Hopkins's private police and the police of other private institutions.

The area that private police will be deployed, the Middle East neighborhood, is already heavily policed, and Hopkins security is a huge presence. Over 6,152 community members stated our opposition to the police force in [this petition](#) which has still not been acknowledged by Hopkins administration. How can we expect the accountability of any future JHUPD if its administration will not even take accountability to deeply listen to, or acknowledge, community members who oppose the formation of the force? Johns Hopkins's actions, which have excluded dissenting voices—including those who most affected by JHUPD—do not bode well for an accountable police force.

Furthermore, over the years, JHU has made many promises to the Middle East neighborhood around the medical campus. In 2002, the Minority Inclusion Agreement promised 8,000 new jobs and a community reinvestment fund in East Baltimore. As of 2019, JHU has created about 1,500 new jobs—20% of what they promised. Hopkins broke their promises while forcibly removing over 700 families from their homes.

In the death of Tyrone West, whose life was taken seven years ago by a Morgan State officer, we see the harm that University policing promises. Research and history show that reform is ineffectual. We've had six years of reform efforts implemented in the wake of the 2014 killings of Eric Garner, Michael Brown, Laquan McDonald, Tamir Rice, and way too many others. Yet, all of that reform didn't save Freddie Gray, or Alton Sterling, or Korryn Gaines, or Walter Scott, or Breonna Taylor, or George Floyd. Reform was not worth those lost lives and it certainly is not worth more.

We want the University to place the funds that were intended for JHPD in the hands of communities, such as residents of the Middle East near the medical campus. This is what the safety Johns Hopkins claims to desire looks like.
