HB0638

Public Safety - Untraceable and Undetectable Firearms

Unfavorable

This bill will not prevent gun-violence. The gun-related crimes are not invoked using firearms made by gunsmiths for customers, rather firearms obtained illegally, floating around between gun-crime committing citizens.

This induces a burden of only law-abiding citizens, who already have to go through various background checks and wait periods before obtaining various firearms. Those with the skill and knowledge to manufacture firearms are not the ones creating crimes.
