

Testimony in OPPOSITION to HB1291 by Christopher D. Toscano of Columbia, MD (February 2021)

Bill Number: HB1291 (Untraceable Firearms)

Position: OPPOSE

Witness and Contact Information: Christopher D. Toscano, Ph.D., 6048 Stevens Forest Rd, Columbia, MD 21045

I am testifying today in OPPOSITION to HB1291 regarding untraceable firearms. An unfinished frame is not and cannot be used as a firearm until it is modified to a functional receiver. Requiring the serialization of a chunk of plastic or metal that is not and cannot be used as a firearm makes no sense as it is possible that this piece of plastic or metal is never, in its lifetime, modified to a functional receiver.
