

Position: SUPPORT

Dear Chair and Members of the Committee,

As a resident of 10th district and *a youth concerned about climate change for XYZ reason*, I am writing to express my strong support of HB11, which will make sure that our subsidies for renewable energy through the Renewable Portfolio Standard are going toward actual renewable energy. We are in a climate crisis, and we cannot afford to be spending our renewable energy money on facilities that emit greenhouse gasses - now is the time to double down Maryland's commitment to truly renewable energy and subsidize only facilities that are emissions-free.

Burning trash, chicken litter, and wood waste and manufacturing methane all pollute the environment, harm nearby communities' health, and contribute to climate change: a bad investment of public dollars that every Maryland utility ratepayer contributes to. Every Renewable Energy Credit that goes toward a facility that emits greenhouse gasses is a Renewable Energy Credit taken away from a facility that does not - an egregious waste of public money.

Because of the inclusion of these polluters in the Renewable Portfolio Standard, Maryland ratepayers paid over \$30 million to buy Renewable Energy Credits from facilities that emit greenhouse gasses in 2020, and over \$246 million since 2008. The Public Employees for Environmental Responsibility estimates that if nothing changes, those costs will mount to half a billion dollars subsidizing polluters by 2030. Please support HB11 so that those dollars can go toward supporting wind, solar, hydro, and geothermal power - not greenhouse gas emissions.

We have to shut down the Bresco incinerator because it is the city's Biggest polluter and it is slowly killing all of us who live in Baltimore and taking 15 years off of our lives. Half of the people here have had asthma or know someone who does and that's not normal. It isn't fair that we got this giant polluter placed in the middle of the city with no warning and WE AS A COMMUNITY have to pay for air. Not with money but with our lives. We didn't ask for this to be placed here so why should we be paying for it. This incinerator ALONE, in a YEAR, only a YEAR causes \$55 million in health damages, which we also pay for. We do not wish to pay for it with our money because the state is calling it renewable energy. So, support this bill and stop giving these incinerators money to pollute our communities. We can use the RPS funds to support real renewable energy.

Best,
Maria Grajales
