

[HB0060](#) - **New Motor Vehicles – Pollution Fee**

Support

HB 0060 places a fee on CO₂ tailpipe emissions produced by a vehicle.

I own an electric vehicle. But even if I didn't, I would support this bill.

We need to create greater incentives to move high-polluting vehicles off the roads, and make the both morally and financially inappropriate.

We are in the fight of our lives, not just for us but for the planet.

I fear for the quality of life – indeed the **quantity of life** – that my children and grandchildren will experience if we don't stop contributing to this quickly unfolding climate disaster.

It is important to note that this fee would not be applied to cars currently on the road, avoiding burdening those car owners who can only afford older cars.

As a mother, grandmother and advocate for environmental and health protection, I urge you to vote for this bill.
