The Maryland Association for the Treatment of Opioid Dependence (MATOD) urges a favorable opinion on SB 394 as amended. MATOD represents over 65 healthcare organizations across Maryland that provide and promote high-quality, effective medication assisted treatment for opioid addiction. MATOD programs serve over 35,000 Marylanders enrolled in opioid treatment programs (OTPs) receiving methadone and buprenorphine, in conjunction with counseling and other medical services.

Senate Bill 394 would require a number of health care and other community service programs to dispense naloxone free of charge to people they know to have a substance use disorder or are at risk of experiencing an overdose. MATOD supports this effort as long as organizations are able to receive the supplies of naloxone free of charge from MDH. We understand the Administration is offering amendment to clarify that MDH will provide the naloxone to organizations being mandated to dispense it. We support this amendment so the bill does not become an unfunded mandate.

The amended version of this legislation represents collaborative work between the Administration and our organization and we support a favorable report on this amended bill.
