Vaccination Requirements - Provision of Services - Statement of Prior Viral Infection

Jennifer Rauhofer

I am writing to support this bill that will add natural immunity to public or private “vaccine passports” policies or requirements for entities that already have them. Natural immunity is a long time understood reality of viruses. The science has not changed regarding how natural immunity works and by not including natural immunity it is unscientific. We’ve been saying follow the science all throughout the pandemic. Natural immunity if following the science.
