

I support this bill for the following reasons.

- Requiring additional immunizations for a child entering school other than immunizations required by the Maryland Department of Health is discriminatory against Black and Brown individuals
- A study of 10 million finds no evidence of asymptomatic spread

- There is no scientific evidence or rational argument supporting mandated vaccination when Covid-19 vaccines do not prevent transmission or infection with SARS CoV-2

- There is [increasing scientific evidence](#) that prior infection and recovery from Covid-19 confers robust, lasting protection against *both* infection and disease which is more effective than vaccine protection against disease

The immune systems of more than 95% of people who recovered from COVID-19 had durable memories of the virus up to eight months after infection.

Please listen to our concerns and protect our freedoms. Scientific evidence shows the vaccines should not be required for all individuals in order to attend school.

Thank you,
