### **Testimony in Support of House Bill 245** **Lisae C. Jordan, Executive Director & Counsel** **Laura Jessick, Sexual Assault Kit Initiative Project Manager** February 9, 2022

The Maryland Coalition Against Sexual Assault (MCASA) is a non-profit membership organization that includes the State's seventeen rape crisis centers, law enforcement, mental health and health care providers, attorneys, educators, survivors of sexual violence and other concerned individuals. MCASA includes the Sexual Assault Legal Institute (SALI), a statewide legal services provider for survivors of sexual assault. MCASA represents the unified voice and combined energy of all of its members working to eliminate sexual violence in the State of Maryland. We urge the Health & Government Operations and Judiciary Committees to report favorably on House Bill 245.

#### **House Bill 245 – Preventing HIV for Rape Survivors**

This bill repeals the sunset on the Program for Preventing HIV Infection for Rape Victims.

**Since 2019, rape survivors have been provided with access to medication to prevent HIV infection after a sexual assault.** This bill repeals the program sunset and establishes it permanently. This will ensure that upon request of a rape victim, and with a prescription from his or her medical provider, the state will pay for the full course of HIV prevention treatment known as non-occupational post exposure prophylaxis (nPEP). The permanent program also provides coverage of necessary, and critical, follow-up care for patients taking nPEP.

**One of the risks faced by rape survivors is HIV infection.**<sup>1</sup> Studies of HIV transmission have been based on consensual sexual activity, and do not account for the violence of rape, so it is unclear what the risk level is, however, 91.9% of rape victims reported some degree of initial fear or concern for contracting HIV and 72.6% reported extreme fear or concern for contracting HIV.<sup>2</sup> However, the cost of medication along with the short window to start effective treatment can be a major deterrent to receiving care.<sup>3</sup> Treatment must begin within 72 hours of the assault and the cost of a full treatment regimen can range from \$1,500 to over \$3,000 depending on health insurance coverage.<sup>4,5</sup> With a permanent program that provides timely and free access to this medication, rape survivors have one less burden to navigate.

(2018).

**The state of Maryland can afford to prevent HIV for rape survivors.** Not every rape survivor that presents for a sexual assault forensic exam (SAFE) will qualify for and choose to take, nPEP using the state program.<sup>6</sup> Some patients choose to utilize their health insurance or a payment assistance program. Since its inception on October 1, 2019 through September 10, 2021, the pilot program identified 1,147 sexual assault survivors that qualified for nPEP medication, of which 328 chose to take the medication. Over this nearly two year period, costs totaled \$707,374.51, including \$379,077.65 for nPEP medication and an additional \$328,296.86 for initial and follow-up care.<sup>7</sup> The lifetime cost of HIV infection is approximately \$379,668 (in 2010 dollars), meaning that if 2 cases of HIV are avoided, the financial cost of nPEP would be more than offset.<sup>8</sup> Financial cost is only one point of analysis, however. Maryland should prevent HIV for rape victims because it is the just and moral thing to do.

**Eliminating the fear of HIV contraction for rape survivors through access to nPEP medication is essential to supporting survivors as they heal both physically and emotionally.** A permanent program to prevent HIV infection for rape survivors not only offers survivors peace of mind but also demonstrates that the state of Maryland supports and protects the lives of rape survivors and maintains that HIV prevention is a public health priority. MCASA urges the Committee to create a permanent program to give sexual assault survivors meaningful access to nPEP and its life- and health-protecting benefits.

**The Maryland Coalition Against Sexual Assault  
urge the Health & Government Operations & Judiciary Committees to  
report favorably on House Bill 245**
