Senator Brian J. Feldman, Chair
Senate Education, Energy, and the Environment Committee
2 West, Miller Senate Office Building
Annapolis, MD 21401

RE: SB 121 – FAVORABLE – More Opportunities for Career-Focused Students Act of 2023

Dear Chair Feldman and Members of the Committee:

The Maryland Transportation Builders and Materials Association (“MTBMA”) has been and continues to serve as the voice for Maryland’s construction transportation industry since 1932. Our association is comprised of 200 members. MTBMA encourages, develops, and protects the prestige of the transportation construction and materials industry in Maryland by establishing and maintaining respected relationships with federal, state, and local public officials. We proactively work with regulatory agencies and governing bodies to represent the interests of the transportation industry and advocate for adequate state and federal funding for Maryland’s multimodal transportation system.

Senate Bill 121 would expand the advisory role of local school systems by requiring them to assist high school students in researching and applying for employment and skills training opportunities across a wide variety of industries throughout the State in a manner similar to how they assist students in preparing for admission to postsecondary institutions.

MTBMA supports SB 121 because it will place comparable emphasis on alternative routes to postsecondary education after high school. Vocational training and apprenticeship programs provide an excellent option to students that result in high-paying, high quality stable careers. Not every student is best suited for traditional post-secondary school, and with these changes, they will be notified of, assisted with, and encouraged to pursue alternative options after they graduate, should that be a better fit. We are experiencing a nationwide labor shortage and this bill will enhance those efforts to increase the workforce by spreading awareness of the numerous options available to high school graduates. The transportation industry would benefit greatly from the influx of a younger, highly trained workforce, and so we support this initiative.

We appreciate you taking the time to address this issue and we respectfully urge a favorable report on Senate Bill 121.

Thank you,

Michael Sakata
President and CEO
Maryland Transportation Builders and Materials Association
