

Unfavorable – HB0101 Condominiums - Common Elements - Clean Energy Equipment

I oppose this because the current legislation already allows this as it states "for the provision of utility services or communication systems" in paragraph 11-125 (f) (2). Solar energy is a utility service and these systems should not be leased in the first place as that is a scam program. The COA should purchase the solar panels and provide a true savings for the Council to which it serves.

We write legislation to protect the rights of the People. We do not need to waste time adding unnecessary wordings to already existing legislation.

I oppose this bill.
