

Dear Committee Members,

I urge you to vote AGAINST on **HB1232**.

This bill would allow for children as young as 3 y.o. to get vaccinated at pharmacies. Pharmacists do not child's health history, not they are trained to properly assess child's health at the time of the visit. Pharmacies are usually a chaotic place and not a proper environment for administering those childhood vaccines. Another moment is in the wording of this bill is for a caretaker to be able to go and vaccinate your kid, that is not acceptable!

Please Vote NO on HB1232.

Thank you,  
Concerned Montgomery County, MD resident Olga Yefimov
