

Jolie McShane Resident of Baltimore County

OPPOSE HB 1232

As the bill is written, a licensed pharmacist may walk into a daycare center and provide vaccines without parental permission. As the bill is written, if the "caregiver" gives approval then the pharmacist can vaccinate all the children three years and older.

This bill is dangerous and why is the primary medical professional for the child not consulted? Why is the parent not mentioned in this bill?

This is pure evil.

Do not allow this bill to pass.
