

SB0645

OPPOSE

Dear Committee Members:

This bill is a World Economic Forum UNAgenda21 globalists' dream, calling for the establishment of a network of "long-distance nonmotorized recreation trails." ? Non-motorized means decarbonization, zero "greenhouse gas emissions," essentially a tiny incremental step toward taking us out of our cars and putting us on bikes and in public transportation. <https://unric.org/en/sustainable-development-goals-cycling/> Like many of these policies, they sound very nice on the surface but they lead to a socialist framework of governance and control of all people and resources, and sadly most people do not see this big picture. Haven't you heard Klaus Schwab on the World Economic Forum's ad saying "You will own nothing and you'll be happy?" And you will eat ze bugs instead of meat. Here's the ad: <https://www.bitchute.com/video/dqAcx0EWZXJx/> No thanks! We didn't elect the WEF members nor the United Nations and do not want their policies here. Take this bill and other bills like it off the docket please and don't bring it back.

Thank you.
