

HB0135 **is another government overreach**, and a UN AGENDA21 tactic, meaning
A push for socialist government, 15-min cities, Plan 2040. It's all totally UNAFFORDABLE.

Walkable, bike rideable is a push for single family car ownership to be taken away and a \$\$\$
fine for having a car, same as taking away gas stoves and gas powered leaf blowers.

Can anyone SAY CHINESE SOCIAL CREDIT SCORE! If they don't like how you think, what you
write or what you say, they (the government) can turn off your power and punish you but not
until they fine/tax you to death.

Say no to this dangerous and bad bill that will cost a fortune to create and will NEVER be
Actually used as it is unsustainable, unaffordable and unreliable.
