

HB0619 – UNFAVORABLE UNCONSTITUTIONAL

Nelda Fink

MD District 32

While the commission is not unconstitutional the purpose behind the commission is unconstitutional. The bill states “*the commission would study how the state may provide publicly financed health care coverage to all residents*”.

Universal Health care violates the rights of the individual in many ways. First it drives the individual needing care to use the American medical system taking away the individual’s right to medical autonomy, the right to make their own medical, health or wellness choices.

Also, many people today such as myself believe the practices of the american medical system violate our religious beliefs. So forcing people to participate in something that violates their religious beliefs is UNCONSTITUTIONAL.

Secondly I as a taxpayer should not be forced to pay for someone’s health care through my taxes, especially when this supposed benefit is against my religion. And if I do the hard work necessary to avoid sickness, I will not be benefitting and will be simply paying for those who are too lazy to practice those techniques that do in fact achieve wellness.

Thirdly, my taxes should not pay for a commission to study something that is UNCONSTITUTIONAL in the first place.

This is UNCONSTITUTIONAL!

100% OPPOSE this bill. I expect an unfavorable report.

Thank you.
