House Delegates-

This is bill is an **un**favorable.

At this time last year, I offered testimony about rabbis who disagreed with the position of the ViceChair. This is the article within this email::

I never received reply nor acknowledgement that she'd read the article. She did not even try to dissuade me from why a rabbi should lessen the number which jewish groups foment. Accuracy matters in education.

In Germany, they're forced to say "^^ million" even when Auschwitz and other camps reduce their numbers by a factor of 10. A logarithmic difference in tallies no longer is fact; it is jewish fiction. So then do we surmise that a Jamaican citizen is in a better stance to evaluate European history with or without reading related material? Delegate Wilkins is not alone. The general lack of diligent research is why this bill should not be funded. In Maryland, due to politics (ask

if you'd like further details during my oral testimony at the bill hearing), numbers, narratives and natural science which refute the purported kills during a world-wide-war become personified facts to **holocaust-defenders**. The fact is the screenshots below show where Europeans themselves have updated "official numbers".

And if you look at the 7th and 8th versions of the book *The Six Million: Fact of Fiction*, you will see screencaps of Auschwitz websites which deny numbers and narratives that camp held as "fact" until the 1990s.

Now... if this book "The Six Million" is used as a text book in Maryland schools, this bill might be redeemable.

But we know that no counter-facts will be offered beyond invented numbers which are being weaponized in the 21st century.

The Six Million: Fact or Fiction?

Jewish population as a hostile force. In response to these campaigns, the National Socialist government organized its own boycott of Jewish businesses within Germany.

These images are most often shown without it being explained that they were reactions to the Jewish-initiated boycott outlined above.
