

HB0192 Elections - In-Person Voting - Proof of Identity

This bill requires voters to present photo ID when voting. Election integrity has become a significant issue for many citizens. Facts such as the more than 40 cases of voters attempting to vote twice in Anne Arundel County during the 2022 Election make people believe the system is rigged. A requirement of providing identification is needed to reassure the population that the system is not rigged. Everyone has an ID as it is needed to transact all essential services like health care, transportation, government aid, education, etc. Adding this requirement to Maryland's voting system will strengthen trust in it.

I support this bill.
