

Oppose SB 738

This is an extremely partisan, ideological bill. Not everything that is published is suitable for consumption by the general public. Mainly, there can be hateful or pornographic content, or just poor quality material. Why aren't you concerned that our libraries are full of garbage, which is also accessible to children? After all, with this bill you are only trying to remove materials AFTER they have been added. Who decides what to add and include in the libraries?

Speaking of religious objections, everyone should be opposed to presenting pornographic materials to children. Everyone except immoral people. To make sure that there is no illegal material that ends up in a children's library, there should rather be a strict review process for INCLUSION of materials. But the bill does not talk about that. On the contrary, it establishes a cumbersome, subjective, and unpredictable process for removal of questionable material.

I strongly urge you to oppose the bill.

Sincerely,
Mark Meyerovich
Gaithersburg, MD
