

HB1088 – Favorable!!!

Nelda Fink

MD District 32

Thank you for hearing my cry! I've made note about the immigrant issue on the Maryland driver's license in many other previous bills. This bill finally corrects the problem with clear and concise language.

Maryland needs better voter registration and plugging the holes that currently exist will bring more confidence to the people of Maryland that their vote actually counts. I don't think many realized this hole with the Maryland driver's license even existed. With this bill voter integrity of those registering can be confirmed and locked in.

I only wish we could require everyone to re-apply to ensure only those who are citizens are currently registered. Because the hole in the Maryland driver's license registration has existed for years we really don't know how many non-citizens are registered.

But this bill offers a step in the right direction.

Thank you for your favorable report on this bill.

Thank you.
